Oshan Mendis

L: Auckland, New Zealand linkedin.com/in/oshan-mendis-4b56b5160

Software Engineer with 6+ years of experience building and maintaining backend services, cloud deployments and automation for global clients in banking and application security. Strong in Java, Spring Boot, Python and JavaScript, with hands-on experience in microservices, REST APIs, AWS, Azure, Kubernetes and CI/CD pipelines. Experienced in working directly with stakeholders, gathering requirements and delivering solutions end to end. Comfortable working independently, troubleshooting issues without escalation, and refactoring existing systems.

Key Skills

- **Languages**: Java, Python, JavaScript, Bash, HTML, CSS
- **Frameworks & Testing**: Spring Boot, JUnit, Mockito
- **Cloud & DevOps**: Azure (Logic Apps, ML Studio), AWS, Kubernetes, Docker, GitHub Actions
- **Databases**: Oracle SQL, PostgreSQL, MongoDB
- **Monitoring & Servers**: Splunk, Sumo Logic logs, Apache Tomcat, JBOSS
- **Platforms & Automation**: ServiceNow (ITSM, Virtual Agent, Flow Designer, REST integrations, Service Portal), Kore.ai, UnifyApps

Achievements

- Improved ServiceNow Virtual Agent AI driven service request recommendations by increasing match accuracy from 32% to 69% resulting in reducing incident ticket creation in enterprise automation project at Virtusa in 2025.
- Successfully delivered a POC of an NLP-based analytics platform that enabled internal stakeholders to assess chatbot effectiveness and customer engagement in 2025.
- Strengthened client relationships and product-market alignment by incorporating direct feedback from feature demonstrations into the development roadmap, resulting in stronger stakeholder engagement and customer satisfaction in the application security project in 2021.

Work Experience

Senior Software Engineer **Jan 2024 – Nov 2025**

Virtusa Pvt Ltd, Sri Lanka

https://www.virtusa.com/

Project:

-

Enterprise Automation Group - Developed an employee support solution using ServiceNow Virtual Agent and built ServiceNow Flow Designer actions to automate business processes to improve operational efficiency using **Azure Logic Apps, Azure ML, and GitHub Actions CI/CD**.

- Built and delivered ServiceNow Virtual Agent topics and Flow Designer actions for an employee support solution, automating business processes and reducing manual ticket handling.
- Worked directly with cross-functional teams and stakeholders on requirements and solution design.
- Performed detailed analysis and task estimations to support project planning and delivery for projects.
- Reviewed code for quality and compliance to identify and resolve defects and performance issues.

Software Engineer **Sep 2022 – Dec 2023**
Virtusa Pvt Ltd, Sri Lanka
Project:

Citibank – Maintained backend microservices for a tool NLP tool by adding new features to assess customer conversations with automated conversational bots for global financial services institution in USA, using **Java, Spring Boot, MongoDB and Microservices.**

- Collaborated with clients gathering user requirements and technical specifications for new developments and improvements.
- Reviewed and maintained coding and standards and best practices, including debugging and troubleshooting.
- Attended client meetings and developed and tested new features matching customer requirements.
- Fixed security vulnerabilities identified through code scanning tools and security assessments ensuring compliance.

Associate Engineer **Mar 2019 – Aug 2022**
Virtusa Pvt Ltd, Sri Lanka
Projects:

COVA Bot - a conversational chatbot for City Bank focused on payment-related services, improving customer self-service by resolving common inquiries and reducing branch walk-ins and support workload using **kore.ai platform**.

- Developed Kore.ai bots and Dialogflow interactions for payment-related services, helping customers resolve common inquiries through self-service.

Veracode (SCA) - Developed a Software Composition Analysis tool for a global leader in application security and risk management to enabling identify security risk and vulnerabilities using **Java, Spring Boot, AWS and Kubernetes**.

- Maintained pre-production testing stacks on AWS and Kubernetes and wrote database migration scripts for safe releases.
- Reviewed merge requests, led code walkthroughs and knowledge transfer sessions, and joined SCRUM ceremonies

Veracode (PCO TOOLS) - Designed and developed an internal platform administration tool for Veracode including an account migration Tool and account purge tool for securely removing unwanted customer data using **Java, Javascript, JSP, Oracle DB**.

- Incorporated new features utilizing secure libraries to ensure code security.

Education

- **Master of Software Engineering**, Yoobee College of Creative Innovation, Auckland, New Zealand
- **Bachelor of Science, Information Technology**, **2019**, Curtin University, Australia.
